Download Tellfy now and improve the communications in your collective

1

COMMUNITIES

Your community is an exclusive space for your group. Here you will have all your communication groups and your users.

2

TYPES OF COMMUNICATION

Create the groups you want within your community. They can be news, participation or attention. To configure your communications according to your needs.

3

TYPES OF ACCESS

Both communities and groups can be public or moderated. If they are public, all users will be able to access. If they are moderated you will need to approve their access.

4

PRIVATE CHATS

In your community you can establish individual communications with your users. You can also enable or disable them to communicate with each other within your community.

5

MÚLTIPLE CONTENTS

You can create content of many types. Send text messages, images, documents, announcements, voice memos, events or polls.

6

PRIVATE AND SECURE

We preserve the privacy of your users by not sharing their personal information. Communications travel in a safe environment.

7

EASY GROUP ACCESS

Share your communities and groups with your users or through social networks, sending invitation links. Or let them find and access your community from the Tellfy search engine.

8

ANALYTICS AND INTELLIGENCE

Access metrics and communications analysis of your community. More active groups, hours of use of your users, location of survey results, recommendations and much more.
