

# Organize and improve communication with families

## Segmented

Communication channels segmented by class groups or for the whole school.

## Effective

Instant notifications. Access through web platform.

## Private

Safe channels, only accessible by families. No personal data is shared.

# Request your Tellfy demo and discover how to improve your school's communication with families.

## 1 CLASS GROUPS

Create one-way communication channels for each class group. Designate teachers or delegates as moderators so they can send communications.

## 2 INFORMATION CHANNEL

Create a general information channel for the school so that all families are informed of what is happening in your center. You can send communications from the app or from the web.

## 3 PRIVATE GROUPS

Create private groups for coordination, with the faculty or with delegates. You can also enable private chats so that authorized people can communicate individually with each other.

## 4 BIDIRECTIONAL CHANNELS

Attention channels can be created with families so that they can communicate with the center or tutors easily and privately.

## 5 MULTIPLE CONTENT

You can create content of many types. Send text messages, pictures, documents, announcements, voice notes, events or surveys.

## 6 ACTIVITIES WITH CAPACITY

Publish activities and events organized by your center and allow families to register from the application itself. You can limit the maximum number of people the activity can have.

## 7 DIGITAL AUTHORIZATIONS

Manage paperless authorizations easily from the application itself. Families will be able to send you their authorization until the deadline you designate.

## 8 COLLECTION OF FEES AND SERVICES

Safe space to manage the collection of fees and services. Your users can easily pay by credit card or even by Bizum.
