

## Improve communication with the relatives of your residents

### Organized communication

Organize your communications through various channels so that they reach family members easily and instantly.

### Communications control

You will have full control over the communications you send, being able to create and delete them centrally and designate the authorized people from your center to send them on each of the channels.

### Private and secure

No personal data is shared. The community of the residence can only be accessed by authorized persons.

# Download Telfy now and improve communication between residents and families

## 1 COMMUNICATION SPACE

Safe and exclusive space for people to communicate with their families or between professionals at the center. It can be accessed with the App or from the Web.

## 2 EASY MANAGEMENT

The community administrator person can create new channels, groups, chats in one click. You can add or remove users within the community.

## 3 INFORMATION PER RESIDENT

Create private groups for the individual communication of each resident, where the people of the center and all their relatives are. You can set them to be one-way or two-way.

## 4 INTERNAL COORDINATION

The solution also allows you internal coordination. Create private groups to coordinate with caregivers and other center staff. Private conversations can also be held.

## 5 MULTIPLE CONTENT

From the application you can send text messages, images, documents, announcements, voice notes, event management with capacity control or quick surveys.

## 6 PRIVATE AND SECURE

We preserve the privacy of all users by not sharing their personal information. Communications travel in a secure environment.

## 7 UNLIMITED VIDEOCALL

You can establish videocall without a time limit from the application itself with the residents' relatives.

## 8 ANALYTICS AND INTELLIGENCE

Access metrics and analysis of interest on the communications you send from the residence.
