The screenshot shows the Zoom authorization page for the Telfy app. At the top left is the Zoom logo. In the center, there are icons for Zoom and Telfy with a double-headed arrow between them. Below this, the text reads "You are about to add Telfy BETA". A warning box states: "App can access and manage this information even when not using the app. This app may enable an in-meeting notification to participants if the app is used to access real-time video, audio, chat, or meeting files. Learn more". A section titled "App can manage information" lists permissions: "Associated with you and others who participate in Zoom experiences with you", "Registration & Scheduling", "Participants", and "Content". At the bottom, there is a checkbox for "Allow this app to use my shared access permissions. Learn more" and two buttons: "Decline" and "Authorize". The "Authorize" button is highlighted with a blue border.
